# CONSTRUCTIONS

## for PIY Passport Journal

Follow these Print-It-Yourself instructions to construct your child's very own passport.

### A PRINT

- ▶ Print passport FRONTS and BACKS.

### B FOLD

- ▶ Now that you have five double-sided printed sheets. Fold each of the five sheets in half, vertically.

### C CUT

- ▶ Cut folded pages horizontally **on dotted lines** to make two folded halves.
- ▶ Place bottom half inside the fold of top half. Open these pages and lay flat open. Set aside.
- ▶ Repeat this process on remaining four pages, laying each new set of pages flat open on top of the previous set to construct passport.

### OPTIONS:

- ▶ Staple spine, if desired.
- ▶ White paper works just fine, but to add a little color, use pastel colored sheets to brighten up your passport.
